

## Bug-Proof Lesson Plan

YOUR NAME:	Alex Williams
Pick a lesson from your unit in Dr. Grace's class. Write a short summary of that lesson plan. Be sure to describe what technology you plan for your students (and you) to use:	I chose lesson 1 which is about character development in the novel <i>the Magician's Nephew</i> by C.S. Lewis. In this lesson, I have students keep track of characters using blogposts.
<b>GNAT</b>	
Look at the class list of possible problems and pick one (or make up your own) that is something that is a temporary problem/issue that could happen to your equipment (the teacher's computer) that would affect your plan. The technology might get fixed before your lesson is over, but might not. What "bug" did you pick:	My computer decides to randomly update itself during a class period that I had planned a kahoot activity.
What could you do that would allow the learning to continue without the technology or in a modified way?	I could have a print out of the questions on hand to either pass out or go over as a class. The students could just write their individual answers on their papers and we then would go over them after.
What do you need to do ahead of time so that plan could be carried out? (Do you need handouts? Other materials? ...)	I would just need to print out the questions ahead of time.
<b>BLACK FLY</b>	
Look at the class list of possible problems and pick one (or make up your own) that is something that is an all-day problem/issue that could happen to you or your students' equipment that would affect your plan. What "bug" did you pick:	The internet or power goes out on days that the students need to work on their blogs.
What could you do that would allow the learning to continue without the technology or in a modified way?	I could just have the students write or type their blog posts and upload them later.
What do you need to do ahead of time so that plan could be carried out? (Do	Just paper and pencils.

you need handouts? Other materials? ...)	
<i>DEADLY ASIAN HORNET</i>	
Look at the class list of possible problems and pick one (or make up your own) that is something that is a multi-day problem/issue that could happen to you and your students' equipment that would affect your plan. What "bug" did you pick:	Partway through the lesson, the site that the students' blogs were on shuts down and their work is lost.
What could you do that would allow the learning to continue without the technology or in a modified way?	I would, first of all, make sure that they didn't do their work only on the blog. Copies saves in more than one place is always a good idea. I would also just have them either share their blog posts with me on google drive or find another blogging site to use.
What do you need to do ahead of time so that plan could be carried out? (Do you need handouts? Other materials? ...)	A back up blogging site would be helpful, as well as making sure they have backups of their work.
